## CODENAME JENNY

Climate change, refugees locked up in detention centres, the rise of the far right - enough reasons for people to get up and change things. But apart from a few half-arsed protests, nothing happens. "Jenny" and her friends decide to take action.

As the state starts coming down on the group, Jenny's dad has to deal with his own militant past, & the meaning of code name "Jenny" becomes ever more blurred.

But where is the line between resistance & terrorism? A film about two generations and their activism.

Join us for the film & discussion afterwards.
